Liferay
Boot Camp 2022
10th Anniversary

Low code website building in Liferay

Pellizzato Giulio
UI/UX Designer

Summary

- ✓ How we actually use Liferay DXP?
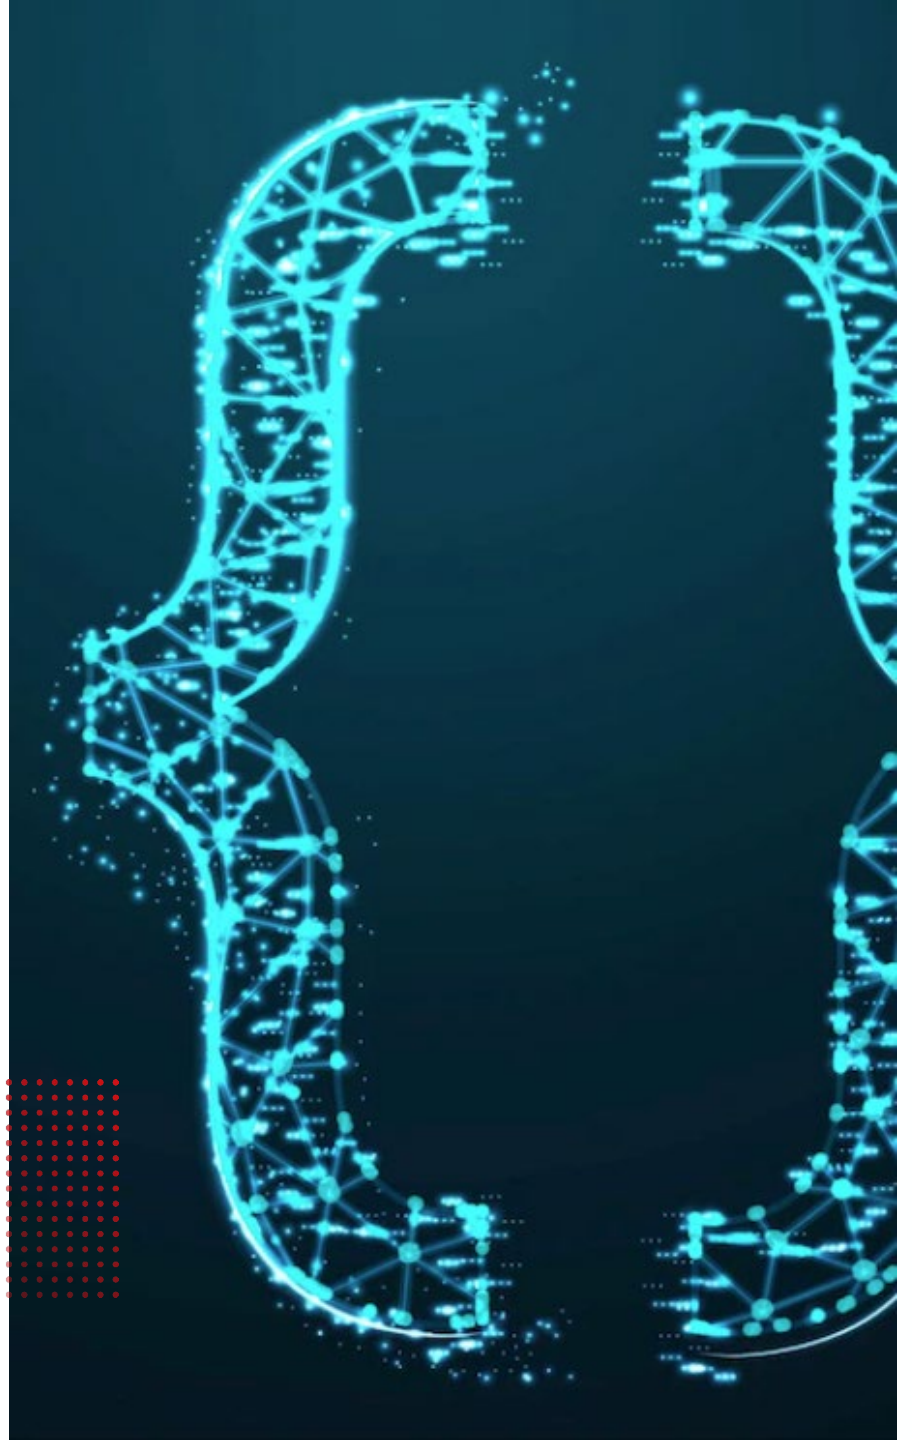

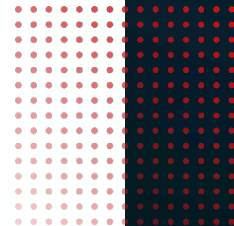

- ✓ Low code approach

- ✓ Let's build

- ✓ Q&A

- ✓ Conclusion

How we actually use Liferay DXP?

One platform, endless solutions

Create customized web experiences

Decrease your customer support costs with our self-service

Increase online revenue with a streamlined digital commerce solution

One platform, endless solutions

Create customized web experiences

Decrease your customer support costs with our self-service

Increase online revenue with a streamlined digital commerce solution
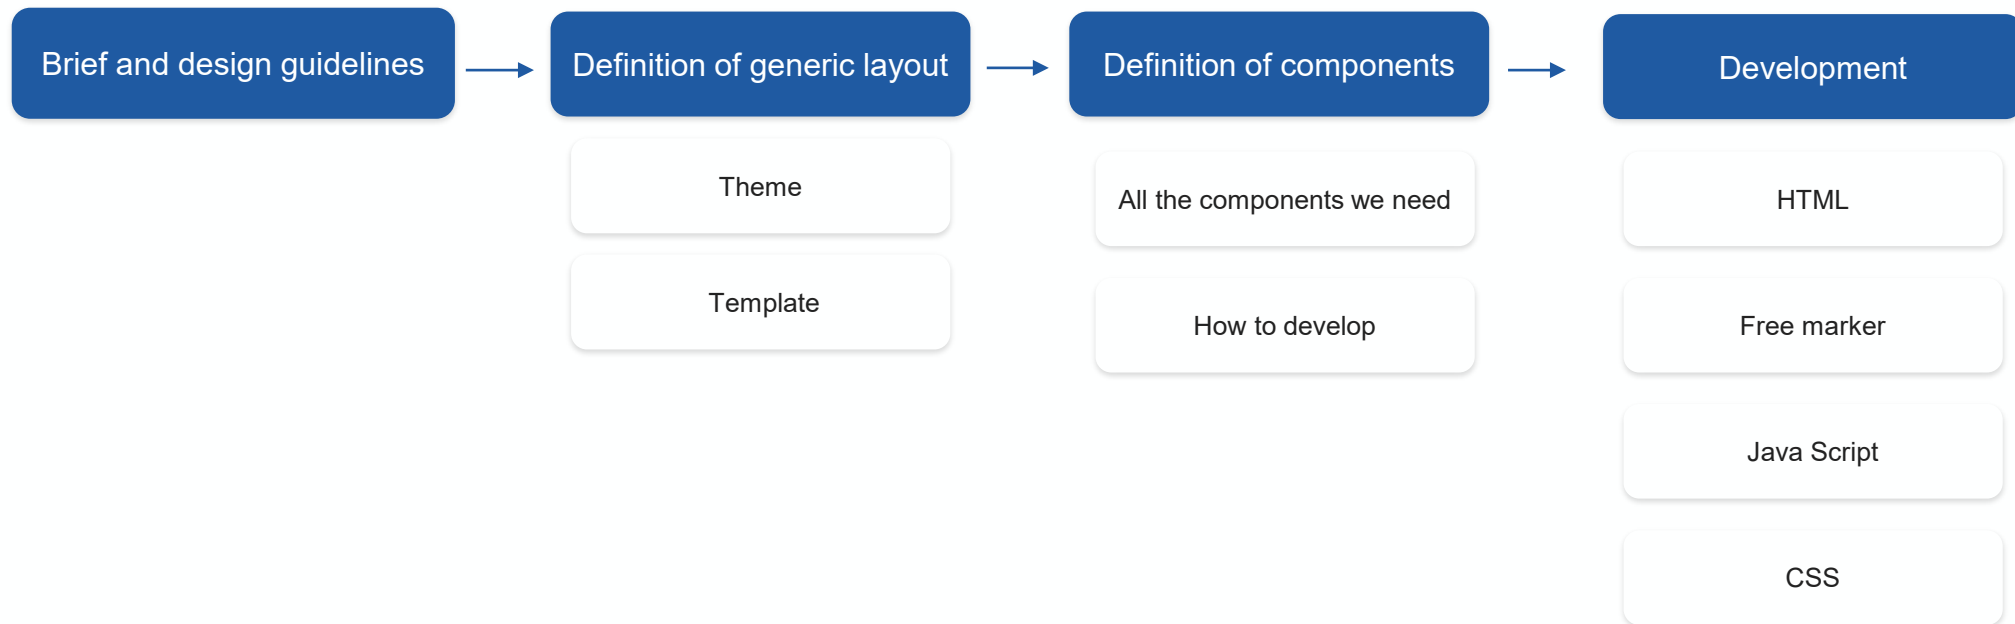

Customer Portals

Partner Portals

Supplier Portals

Employee Portals

The "as-is" process

Brief and design guidelines	→	Definition of generic layout	→	Definition of components	→	Development

Definition of generic layout
- Theme
- Template

Definition of components
- All the components we need
- How to develop

Development
- HTML
- Free marker
- Java Script
- CSS

Low Code approach

No more coding... in the future

Liferay develops some features that help the editors to build his own website or edit an already existing portal, without open tickets or bother developer
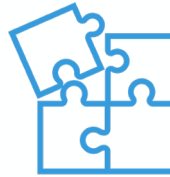

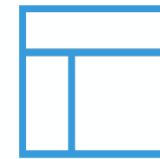

Tools that will shorten the road between design and implementation

Stylebook

Fragments

Page templates

Collection

Master page

Content and widgets
